

# **COST Action TD1406: Innovation in Intelligent Management of Heritage Buildings (i2MHB)**

**(06/05/2015 to 05/05/2019)**

The objective of the i2MHB Action was to create a pan-European open network, to promote synergies among Heritage Science's specialists, industrial stakeholders and research/education players, to achieve a unified common understanding and operation in the HBs' domain, integrating multidisciplinary expertise, technology and know-how through a novel and independent global framework.

COST Action TD1406 engaged, from the beginning, several groups from different sectors, in order to achieve a "critical mass" covering the whole range of expertise required to accomplish the Action's scientific and technological goals. This multidisciplinary empowered several distinct ways to set up the Action, each of them producing distinct concepts based on the selection of priorities. The network gathered specialists from distinct fields, such as electrical and electronic engineering, information engineering (28.9%), civil engineering (15.6%), computer and information sciences (15.6%), economics and business (6.7%) and history and archaeology (6.7%). These groups of specialists were gathered from a distinct set of organizations, for example, higher education and associated organisations (66.7%), business enterprises (15.6%), private non-profit without market revenues or NGOs (11.1%) and government/intergovernmental organisations (6.7%). All together 26 countries were represented in the network: Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Estonia, France, Germany, Greece, Ireland, Israel, Italy, Latvia, Lithuania, Malta, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Switzerland, United Kingdom and Former Yugoslav Republic of Macedonia.

COST Action TD1406 supported more than 50 STSMs involving the following countries: CY, DE, EE, EL, ES, FR, HR, IL, IT, LT, MK, MT, PT, RO, RS, SI, UK. COST Action TD1406 organized 5 training schools: Aguilar de Campoo, Palencia, Spain (January 2016), Poreč, Croatia (September 2016), Rome, Italy (October 2017), Olimje, Podčetrtek, Slovenija (April 2018) and Chalon-sur-Saône, France (April 2019). These training schools involved around 100 trainees and more than 20 external trainers (outside the Action). Amongst several scientific publications, COST Action TD1406 findings are published in a Public Report (Integration of heritage buildings and sites in their surroundings), in a final book (Innovation in Intelligent Management of Heritage Buildings (i2MHB)) and in an e-book.

The following list of participants actively took part in the Action (contributing to its success), either as Chair, Vice-Chair, Science officer, Working Group leader and vice-leader, STSM Coordinator, Communication Officer, Administrative officer, MC member, STSM participant, Training School participant (trainer or trainee) or Working Group participant. The list follows an alphabetic order.
